REMARKS

Applicant respectfully notes that the cited documents were cited during prosecution of a counterpart Japanese patent application corresponding to the above-referenced application. Abstracts for each of the Japanese documents were obtained from a commercial database and are also enclosed herewith.

Applicant respectfully submits that Japanese Laid-Open Patent Application No. 9-311273 shows, e.g., in Figs. 1 and 3 a zoom lens comprising a first lens unit

consisting of, in order from the object side to the image side, a negative lens element, a negative lens element, and a positive lens element, and a second lens unit consisting of, in order from the object side to the image side, a positive lens element, a negative lens element, and a positive lens element.

Applicants respectfully submit that Japanese Laid-Open Patent Application No. 10-3037 corresponds to U.S. Patent No. 5,978,154, and Japanese Laid-Open Patent Application No. 4-304410 corresponds to U.S. Patent No. 5,331,464.

Applicant respectfully submits that Japanese Laid-Open Patent Application No. 4-114115 shows, e.g., in Figs. 2 and 4 a zoom lens comprising a first lens unit consisting of, in order from the object side to the image side, a positive lens element, a negative lens element, a negative lens element, and a positive lens element, and a second lens unit consisting of, in order from the object side to the image side, a positive lens element, a positive lens element, a negative lens element, and a positive lens element.

Applicant respectfully submits that Japanese Laid-Open Patent Application No. 60-55311 shows, e.g., in Figs 1 and 4 a zoom lens which comprises a first lens unit consisting of, in order from the object side to the image side, a positive lens element, a negative lens element, a negative lens element, and a positive lens element, and a second lens unit consisting of, in order from the object side to the image side, a positive lens element, a positive lens element, a negative lens element, and a positive lens element.

Applicant respectfully submits that Japanese Laid-Open Patent Application Nos. 4-304410, 4-114115, and 60-55311 fail to disclose or suggest a camera comprising an image pickup element in combination with a parallel plate as recited, inter alia, in Claims 46 and 47.
